

Mandatory Language for Monitoring/Reporting Violation
Failure to Submit a Disinfectant Level Quarterly Operating Report (DLQOR)
MONITORING, ROUTINE (DBP), MAJOR/CHLORINE

The SPRING CREEK SCHOOL water system PWS ID 1170020 has violated the monitoring/reporting requirements set by Texas Commission on Environmental Quality (TCEQ) in Title 30, Texas Administrative Code (30 TAC), Section 290, Subchapter F. Public water systems are required to properly disinfect water before distribution, maintain acceptable disinfection residuals within the distribution system, monitor the disinfectant residual at various locations throughout the distribution system, and report the results of that monitoring to the TCEQ on a quarterly basis.

Results of regular monitoring are an indicator of whether or not your drinking water is safe from microbial contamination.

This violation occurred in the monitoring period Fourth Quarter 10/01/2021 – 12/31/2021.

We are taking the following actions to address this issue:

Quarterly reporting of the disinfectant level of our water system will be completed in a timely manner.

Please share this information with all people who drink this water, especially those who may not have received this notice directly (i.e., people in apartments, nursing home, schools, and businesses). You can do this by posting this notice in a public place or distributing copies by hand or mail.

If you have questions regarding this matter, you may contact Ken Miller at 806 273-6791.
